Custom Calling Features

For Our Customers

These custom calling features are designed for your convenience. They give you control over the communication coming into your home, and make your telephone a more useful tool to serve your lifestyle.

This booklet contains simple, step-by-step instructions for each custom calling feature. For assistance with getting the most from these features, contact a Customer Service Representative at 1 800 737-3900.

CALLER ID

Caller ID lets you see the calling party's phone number before answering a call.

To use Caller ID:

1. Wait for the start of the second full ring of your phone set.
2. The number of the calling party will appear on your display

CALLER ID DELUXE

Get even more information than ever before.

Caller ID Deluxe lets you see both name and telephone number of the calling party.

CALL BLOCK

Call Block allows you to create a list of six (6) phone numbers from which you do not wish to receive calls.

Calls from a phone number on your list are sent to a recorded announcement that informs the caller that you are not receiving calls at this time.

To Use Call Block:

1. Press *60
2. Listen to the voice instructions which will guide you through the steps of how to:
 - Turn Call on or off.
 - Make necessary changes to your Call Screening List

Press the numbers or symbols below to:

- 0 Repeat the instructions.
- 1 Review the numbers on your Call Block list.
- 3 Turn Call Block on/off.
- # Add a number on your Call Block list.
- * Delete a number from your Call Block list.
- 08 Delete all numbers from your Call Block list

Note: If a number on your Call Block list is put on any of your lists (for example, Call Selector) then Call Block will override the other services for that phone number.

PER-CALL BLOCKING

Keep your number from being displayed for individual calls you make.

To activate on a touch-tone phone:

1. Dial *67 and the telephone number.

To activate on a rotary phone:

1. Dial 1167 and the telephone number.

Make sure you do this before you dial your call. Even if you have a non-published or unlisted number, you need to dial the blocking code before placing a call to prevent your number/ name from being displayed.

ANONYMOUS CALL REJECTION

This allows the customer to reject incoming calls with a telephone number that has been blocked from being delivered for your review. Call Customer Service to add this feature.

CALL WAITING

Call Waiting lets you know someone else is calling when you are using your telephone.

CALL WAITING DELUXE

Call Waiting Deluxe allows the customer to view the directory name and number (where available) of an incoming telephone call when the telephone is already in use. This gives the customer three options:

The customer can answer the waiting call on hold, alternate between new call and the original call or ignore the waiting call. You must have Caller ID Deluxe to use this feature.

CALL FORWARDING

Send your incoming calls to any telephone you can dial direct. There are two Call Forwarding Options.

Fixed Number Call Forwarding:

With this option, the forward-to number you select is permanently programmed by the telephone company.

To activate:

1. Dial 72
2. Listen for two bursts of dial tone (confirmation tone).

To deactivate:

1. Dial 73
2. Listen for the confirmation tone.

Any Number Call Forwarding:

With this option, you must select the forward-to number when you activate Call Forwarding.

To activate:

1. Dial 72
2. Listen for dial tone.
3. Dial the number to which your calls are to be forwarded. (If this is a long-distance call from your telephone, you will be charged for all forwarded calls.) Wait for confirmation tone. The called number will be stored and forwarding is activated whether the call is answered or not.

To deactivate:

1. Dial 73. Two bursts of dial tone indicate that deactivation has taken place.

PREFERRED CALL FORWARDING

Preferred Call Forwarding allows you to create a list of phone numbers that are to be forwarded when they call you.

To use Preferred Call Forwarding:

1. Press *63
2. The instructions will guide you through the steps of how to turn your Preferred Call Forwarding on or off, and make any changes to your Preferred Call Forwarding list.

Press the numbers or symbols below to:

- 0 Repeat the instructions.
- 1 Review the numbers on your Preferred Call Forwarding List.
- 3 Turn Preferred Call Forwarding On/Off.
- # Add a number to your Preferred Call Forwarding.
- * Delete a number from your Preferred Call Forwarding list.
- 08 Delete all numbers from your Preferred Call Forwarding list.

REPEAT DIALING

Repeat Dialing allows you to dial a code to have your phone continuously attempt to redial a busy number. You can also use Repeat Dialing to redial the last number you called.

To use Repeat Dialing:

1. Hang up, then lift the receiver and listen for a dial tone.
2. Press *66.
3. If the line is busy: Listen for three beeps or a recording telling you the number is busy and then hang up. You will hear a short-short-long ring when the line is free. Your call will then be automatically made when you lift the handset.

To cancel Repeat Dialing:

1. Press *86
2. Listen for tone or announcement.

Notes:

- While Repeat Dialing is activated, you may still make and receive other calls.
- Repeat Dialing will continuously attempt to call back a busy number for 30 minutes. After 30 minutes, your request will be cancelled.
- You can use Repeat Dialing for more than one busy number at a time. You will hear a special ring whenever these numbers become idle. However, you will not be able to tell which of the numbers it is.
- If the number you are trying to reach is outside the area served by Repeat Dialing, you will hear a recording advising you that the call cannot be made.
- You can also use Repeat Dialing to redial the last number you called.

THREE-WAY CALLING

Add a third party to your phone conversation on either local or long distance calls.

To establish a second connection:

1. Flash the switchhook. Listen for three bursts of dial tone.
2. Dial the number of the third party. (If third party does not answer, flash the switchhook to return to the original call.)
3. When the third party answers, flash your switchhook to set up a three-way conference. If either of the other two parties hangs up first, you will still be connected to the remaining party. If you hang up first, all connections are released.

CALL RETURN

Call Return allows you to dial a code and have a call automatically returned to the last party who called or attempted to call you.

To use Call Return:

1. Press *69.
2. Listen for an announcement that will tell you the phone number of the party who last called you.
3. If you wish to return the call: Press 1. Listen for ringing. Wait for answer.
4. If you do not wish to return the call, hang up.
5. If the line is busy: Listen for the announcement telling you the number is busy, and then hang up. You will hear a short-short-long ring when the line is free. The call will automatically be made when you lift the handset.

To cancel Call Return:

1. Press *89.
2. Listen for tone or announcement.

Notes:

- There is no time limit for returning a missed call. However, you will only be able to return the last incoming call you received.
- If the number that you are trying to reach is outside the area service by Call Return, you will hear a recording advising you that the call cannot be made.
- After a call during which you heard a Call Waiting tone, you can use Call Return to dial the last incoming Call Waiting number.

CALL SELECTOR

Call Selector allows you to program your phone line to ring with a special ringing pattern whenever you are called from a select list of phone numbers.

If you also have Call Waiting, then you will hear a distinctive Call Waiting tone whenever someone on your list calls while you are on the phone.

To use Call Selector:

1. Press *61.
2. Listen to the voice instructions which will guide you through the steps of how to:
 - Turn Call Selector on or off.
 - Make Changes to your Call Selector list.

Press the numbers or symbols below to:

- 0 Repeat the instructions.
- 1 Review the numbers on Call Selector list.
- 3 Turn Call Selector on/off.
- # Add a number to your Call Selector list.
- 08 Delete all numbers from your Call Selector list.

VOICE MAIL

Voice Mail Answering Service can be there when you can't. Whether you are away from home or on the phone, every call gets answered, 24 hours a day, 7 days a week. At any time, from anywhere, Voice Mail will record and playback your messages. All you will need is a push-button phone.

To Activate (first time only):

1. Dial *15 (Texas - Dial 123) from your home phone.
While listening to the introductory prompt, press the # button.
2. Then enter your temporary password by pressing 1234.

Follow the system's instructions and enter your new password. Record your name and personal greeting if desired. You are now ready to use Voice Mail.

To Retrieve Messages:

- A stuttered dial tone will indicate when a message is waiting.
1. Dial 123 and the # button, then your personal password. Your messages will be replayed in the order they were received. Messages may be replayed, saved or erased by using the keys on your touchtone phone. (continued)

To get your messages away from home:

1. Dial your telephone number.
2. Press the # key when your message begins.
3. Enter your password.

Press the numbers or symbols below to:

- 1 Rewind message
- 2 Save message
- 3 Erase message
- 4 Reply message
- 8 Pause message
- 9 Forward message

SPEED DIALING

Speed Dialing lets you reach frequently called numbers (local or long distance) by dialing only one or two digits. Choose from two Speed Dialing features.

- **8-Number One-Digit Speed Dialing**
If you have 8 numbers, you will use speed dialing codes 2 to 9.
- **30-Number Two-Digit Speed Dialing**
If you have 30 numbers, you will use the speed dialing codes 20 through 49.

To Store Speed Dialing Codes:

- If you have Speed Dialing 8: Dial 74.
- For Speed Dialing 30: Dial 75.

Listen for dial tone again.

1. From the available codes, dial the one you wish to use for the number you are storing.
2. Dial the calling number you wish to store. Listen for two bursts of dial tone to indicate that the number has been stored correctly.
3. Hang up and repeat the procedure for each number to be stored using a different code for each stored number.

Using Speed Dialing:

To use speed dialing, dial the code for the number you wish to call. The call will be processed just as if you had dialed the complete number. Long-distance and toll charges will still apply to calls outside your calling area.

TEL-A-WAKE*

Tel-A-Wake gives you a wake up call that doesn't fail, even in power outages.

To activate:

1. Dial #76. Wait for the confirmation tone (two beeps).
Dial the desired time to be called in military time—4 digits required.
Example: 0700 is 7 a.m.; 1900 is 7 p.m.
2. Select the number of rings by dialing 1–9 or the # button for 10 rings. Wait for the confirmation tone (two beeps) or press #, then replace the receiver.
3. A wake-up call will be made at the designated time. If the wake-up call is not answered on the first attempt, 7 minutes later the call will be attempted again. If the second call is not answered, it will be repeated one more time.

To deactivate:

Dial #77. Wait for the confirmation tone of two beeps or press #.

*Tel-A-Wake must be reset each night. *ONLY AVAILABLE IN TEXAS

HOT LINE/WARM LINE

A hot line allows you to automatically call a pre-assigned number each time you pick up your telephone. A warm line allows you to automatically call a pre-assigned number each time you pick up your telephone but the call is delayed five seconds to allow you to dial another number if preferred.
